N E

Selene is the new shower tray that combines innovation and design with functionality and simplicity. With pure and clean lines, straight and without a perimeter frame, which contrasts with the full moon-shaped circular grate with a slight relief, providing a differential creative value.

The grate is combined with the shower tray in slate texture, rounded with a soft convex shape and rests on light legs that give it an exclusive and innovative design.

SFERA

DREAMY SINUOUS
ASYMMETRY

S F E R A

Design is combined with asymmetry and texture. Sfera represents the most natural beauty, a shower tray with a design inspired by nature and created to dream.

Asymmetrical and with rounded shapes, the new Sfera tray takes creativity to the extreme in its shapes with a soft curved frame on one side, which ends its sinuous path in an original moon-shaped grate. Sfera has a double texture on the surface, one on the inside and another on the grate and its curved side frame surrounding it.

FURTHER LEVEL

Far more than a bathroom cladding option. In addition to their functional role in covering walls or in the simple switch from a bathtub to a shower, Fiora's Skin Panels offer a creative proposal for design and aesthetic renovation at a further level.

Panels take spaces on a new perspective, combining texture and colour with the existing elements in the bathroom, and increasing the possibilities of each space as far as your imagination will take you.
